

Starts Tuesday, August 27 thru December.

# CYBERSECURITY

## Certification Study Group

## CompTIA Security+ version 701

### Ash Flat Library Study Group

#### Qualify for federal employment at DoD IAT Level II

Want to break into **cybersecurity** or get past that imposter syndrome?

Are you in Emergency Management **OR** responsible for SCADA, PLC's (ICS) systems **OR** involved in Healthcare I.T. or a military Veteran (extra points here) finding your way?

Are you a Arkansas **Commissioned Officer** with a knack for computers and networking?

**OR** are you a high school geek that thinks computers are child's play?

Do you deal with Intellectual Property law? HIPAA Compliance? PCI, SOX, ISO standardization & Compliance? Risk Management?

Based on CompTIA, a vendor-neutral global certifying body. (They're the A+ people).

Group focus is CompTIA's **Official Student guides**.

## We're at Ash Flat Library

## 2<sup>nd</sup> & 4<sup>th</sup> Tuesday(s), 5-6.

This is a study group only and not a class and not affiliated with our hosts or any commercial establishment and not for profit; no money changing hands. We can learn from each other.

CompTIA is a vendor-neutral Certifying body and the Security+ certification meets several DoD qualifications and will qualify you for online employment with government.

Anyone with a genuine interest can attend and will be tolerated, but the focus will be to **study for the certification**. Bring your book & laptop. Email: [CyberNorm@pm.me](mailto:CyberNorm@pm.me)
